

## Building Keyboarding Skills

**Use the power of Games! There are many out there. Here are some that might be fun for you.**

- [Nitro Type](#)- Improve your typing skills while competing from other typers from around the world.
- [Alphabet Rain](#)- Type the letters as they fall from the sky before they hit the ground.
- [Learn 2 Type](#)- See how many WPM you can type in a paragraph.
- [Outerspace Fleet Commander](#)- Type words or groups of letters before they touch your spaceship. Three different levels to choose from.
- [Timed Typing Test](#)- Type quickly and accurately to see how many WPM you can type.
- [Typing on Ghosts](#)- Typing letters on ghosts makes them disappear. (Richard Bryne suggestions)
- [DancematBBC.com](#)- With funny animals and musical motivations this is a great one used by therapists.

Don't forget that sometimes typing together with your child can be fun and using the search bar to look for subjects of interest!
